ADA Photopolymer Sign

#POLY106
Size: 10" x 6"
Photopolymer sign made from 1/4" thick photopolymer with raised letters and selected custom PMS color match paint & silkscreen.

ADA Photopolymer Sign

#POLY86
Size: 8" x 6"
Photopolymer sign made from 1/8" thick photopolymer (raised letters and braille) with two parts, beveled edges mounted on a painted backer plate.
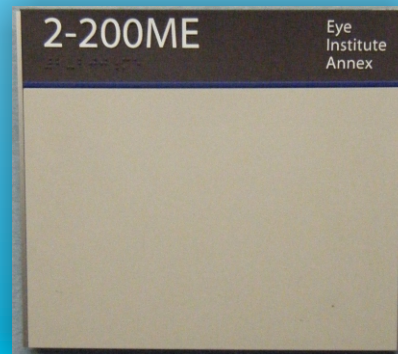

ADA Photopolymer Sign

#POLY "CS"
Size: Cut Shape Photopolymer sign made from 1/16" thick photopolymer with special cut shape and Moz aluminum plate mounted on a white acrylic backer plate.

ADA Photopolymer Sign

#POLY29
Size: 2" x 9"
Photopolymer sign made from 1/32" thick photopolymer with special cut header plate mounted on a "Infonorm" system frame.

A photopolymer sign is made from plastic that is permanently bonded to a substrate as one piece.
The raised letters and braille portion of the sign is 1/32" to meet the ADA Specifications.
*Then Matthews acrylic polyurethane paint is applied on photopolymer.*
The raised portion of the sign is then silk screened in a contrasting color to produce the finished sign.
Most photopolymer signs are 1/32, 1/16, 1/8" or 1/4" thick.
However other thicknesses are achieved by adding a acrylic backer to achieve the thickness desired. Photopolymer signs are available with square or rounded corners and can be special shaped if needed.

** Made to meet the specifications of the Americans with Disabilities Act (ADA)
We do all the Braille translations for you!

ADA Sign - Applique
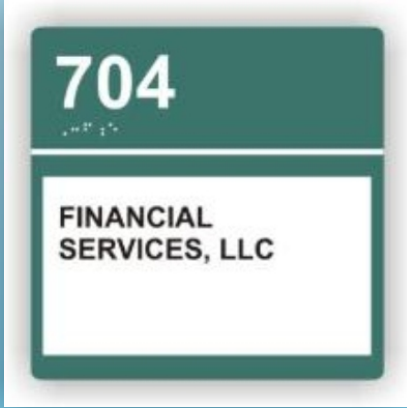

#ADA88W
Size: 8" x 8"
ADA Sign made with applique, raised letters, and raster braille with window for paper insert.

ADA Sign - Applique

#ADA1212
Size: 12" x 12" ADA Sign made with applique raised letters and braille on painted substrate, with aluminum wall frame.

ADA Sign - Applique

#ADA1210
Size: 12" x 10" ADA Sign made with Applique raised letters and Braille header, with silkscreened evacuation map.

ADA Sign - Applique

#ADA66
Size: 6" x 6" ADA Sign made with applique raised letters and braille on plastic.

The ADA applique sign is made from a plastic substrate (thickness as desired; 1/16 - 1/8 -3/16 - 1/4") that has laser cut 1/32" thick applique letters attached to the plastic with thin double faced tape. The substrate and/or lettering can be custom painted in any custom color. The braille is done by engraving or drilling small holes in the background and then have small rasters (balls) inserted into the holes. This creates a beautiful finish and smooth feeling to the touch. This method is the most cost effective available for ADA Signs.
