

# One Standard Module Size & Greater Energy Efficiency The Smart Choice is GREEN.

## Standard Modules

Our new modules maintain our exceptional brightness standard while being more energy efficient than ever before.

Having the ability to use any of our new modules with any of our cabinets also means a shorter production time. That means you can get your sign faster.

Standard module sizing also gives you the ability to upgrade your sign in the future. As your signage needs change, you may find that you want better picture quality. Standard module sizing means you can upgrade your modules with out having to buy a new sign. That means you save money.

## What's New?

Full & single color modules, regardless of pixel pitch, are now one convenient size.

Module Size: 12.59 inches x 12.59 inches  
(320 millimeters x 320 millimeters)

### Effect Outdoor Pixel

Pitch and New Matrix:

|                        |           |
|------------------------|-----------|
| 6mm(FCo Series only)   | - 48 x 48 |
| 10mm(FCo & SCo Series) | - 32 x 32 |
| 16mm(FCo & SCo Series) | - 20 x 20 |
| 20mm(FCo & SCo Series) | - 16 x 16 |

The standard module is now screwless, meaning they are *front and rear serviceable*.

After extensive research and development, we have been able to decrease our power consumption. That's an *energy savings of 25.95%* while still maintaining 10,000 NITs brightness.

The SMART choice has become the **GREEN** choice.
